Mahek Chaudhary

+91-7709601863 | cmahek301@gmail.com | GitHub | Mumbai, Maharashtra, India

Summary

Motivated B.Sc. Computer Science graduate seeking an entry-level software development role. Passionate about building scalable, high-performance applications and leveraging machine learning techniques to solve real-world problems. Eager to contribute to innovative engineering teams and grow through impactful projects.

Education

Royal College of Arts, Science and Commerce, Mumbai University — Mumbai, India
Bachelor of Science in Computer Science | SGPA: 7.59 — *June 2023 – April 2026*

Technical Skills

Languages: Java, Python, JavaScript, SQL, R
Web Technologies: HTML, CSS, React.js, Bootstrap, FastAPI, Flask, REST APIs, JWT Authentication
Databases: MySQL, MongoDB, MongoDB Atlas
Machine Learning: Scikit-learn, Logistic Regression, Random Forest, SVM, XGBoost
Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, NetBeans, IDLE, Docker
Concepts: Data Structures & Algorithms, Object-Oriented Programming, System Design Fundamentals, CRUD Operations, Agile Development

Experience

Software Development Intern — Aug 2025 – Feb 2026
SDAC Infotech — *Hybrid, India*

- Completed a Hybrid App Development Internship focused on Java, OOP, MVC Architecture, System Design, Computer Networks, and Software Development Fundamental.
- Applied programming and problem-solving skills through coding, debugging, and application development tasks.
- Gained exposure to SDLC, database concepts, software architecture, networking fundamentals, database management and industry best practices.
- Recognized for exceptional performance upon completion of the internship.

Projects

Heart Attack Prediction Using Machine Learning | *React.js, FastAPI, Python, MongoDB Atlas* — March 2026

- This is a client-based project delivered as a full-stack solution end-to-end.
- Engineered a full-stack cardiovascular risk-assessment application with a React.js frontend and a FastAPI backend, serving real-time predictions to end users.
- Trained and benchmarked 4 machine learning models (Logistic Regression, Random Forest, SVM, XGBoost), achieving ∼91% prediction accuracy on patient data.
- Designed a MongoDB Atlas schema for scalable data persistence and implemented JWT-based authentication to secure user sessions.
- Built a risk-prediction dashboard, personalized health recommendations, patient history tracking, and a hospital-locator module.

Inventory Management System | *Python, Flask, MySQL* — Oct 2025

- This is a client-based project built to meet real-world business requirements.
- Designed and built a full-featured inventory management system using Flask with a normalized MySQL relational schema.
- Implemented complete CRUD operations and real-time inventory tracking across products, customers, suppliers, and billing modules.
- Automated report-generation workflows, reducing manual reporting effort and improving data accuracy.

Certifications and Professional Experience

AWS (Forage) – Solutions Architecture Job Simulation: Designed a simple, scalable hosting architecture through practical tasks in a virtual job simulation.
The Alan Turing Institute – Data Visualization and Visual Analytics: Completed the course covering data visualization and visual analytics concepts.
NASA – Open Science 101: Completed NASA's Open Science 101 curriculum covering open science principles and practices.
Anthropic – Introduction to Model Context Protocol: Completed the course on Model Context Protocol (MCP) for connecting AI models with external tools and data sources.
Anthropic – AI Fluency: Framework & Foundations: Completed the course covering the foundations and framework of effective, responsible human–AI collaboration.
BlueDot Impact – Future of AI: Completed a 2-hour professional certification covering today's AI systems through hands-on demos and case studies, potential paths toward AGI, and the societal implications of AI.
Royal College of Arts, Science and Commerce – Inter-Collegiate Webinar on Federated Learning & Advancements in AI: Attended the webinar organized by the Department of Computer Science on federated learning and recent advancements in AI.
